

Estate planning involves the development of a plan for managing your assets and affairs during your lifetime, in case of incapacity, and upon your death. Every adult should have an estate plan including a will, a health care directive, and a durable power of attorney. People with even modest assets should consider wealth preservation strategies, such as the use of trusts. At The Gallagher Law Firm, we can create an estate plan that is tailored with your specific needs and goals in mind.

The Gallagher Law Firm provides quality representation for estate planning matters, including:
